Many natural/genuine gemstones are processed and/or enhanced from the time they are extracted from the earth by one or more traditionally accepted jewelry industry practices. All natural/genuine gemstones sold in our store have probably been subjected to a stable and possibly undetectable enhancement process. All relevant information will be readily provided to the best of our knowledge. Prevailing market values are based on these accepted processes by the gem and jewelry trade. Created gemstones have the same chemical and mineral characteristics as their natural counterparts, the difference is they have been created in the laboratory.
